

Treatment Planning Tools – ASI-MV

These Treatment Planning Tools summarize the client’s self-reported data from the ASI-MV. When used in conjunction with the Problem Lists & Key Clusters and the ASI-MV Narrative Report, they provide useful information that may be addressed on the client’s treatment care plan. This is only a guide and not intended to identify all strengths, all risks and all problem areas. Clinicians must use their clinical judgment to fully evaluate the client in a face-to-face interview. Potential client worksheets and handouts can be customized and printed from the ASI-MV Clinician Toolbox.

Domain	Severity Ratings*	Client’s Perception: Is this a problem?	Client’s Motivation: Is help wanted?
<i>Medical</i>	0	0	0
<i>Employment</i>	7	3	2
<i>Alcohol</i>	6	4	3
<i>Drug</i>	4	2	1
<i>Legal</i>	0	0	0
<i>Family/Social</i>	1	0	0
<i>Psychiatric</i>	1	1	1

0 = Not at all; 1 = Slightly; 2 = Moderately; 3 = Considerably; 4 = Extremely

*Severity Rating Legend: 0 – 1 No real problem; 2 – 3 Slight problem; 4 – 5 Moderate problem; 6 – 7 Considerable problem; 8 – 9 Extreme problem

KEY CLUSTERS – ASI-MV

	Possible Psychiatric Risks	Comments
1	Has been thinking of hurting self today.	
2	Has helpless & hopeless feelings today.	
3	Has made a suicide attempt in the past 30 days.	
4	Has had a suicide plan in the past 30 days.	
5	Has hallucinated today.	
6	Has hallucinated in the past 30 days.	
7	Reports being sexually abused in past 30 days.	
8	Reports being physically abused in past 30 days.	
9	Reports being emotionally abused in past 30 days.
