

## Crosswalk of Common Spine ICD-9-CM Codes to ICD-10 Codes

As of October 1, 2015, all health care entities covered by the Health Insurance Portability and Accountability Act (HIPAA) will be required to use ICD-10 codes in place of the existing ICD-9-CM code set for medical diagnoses. ICD-10 is a more detailed system that will allow for collection of more specific data about patient diagnoses. ICD-10 codes are 3-7 digits compared with the 3-5 digits in ICD-9-CM.

Following is a crosswalk of ICD-9-CM codes commonly used in spine care to the new ICD-10 codes. These recommendations reflect the opinions of the NASS Coding Committee and do not constitute an official position or statement by NASS.

Watch the NASS website for additional information as the transition deadline approaches. Additionally, the Centers for Medicare and Medicaid Services (CMS) has numerous resources designed to assist in implementing ICD-10: <http://www.cms.gov/Medicare/Coding/ICD10/index.html?redirect=/icd10>
